MARINE SAFETY INFORMATION BULLETIN 24-11

July 7, 2011

ATLANTIC COAST PORT ACCESS ROUTES STUDY

The Bureau of Ocean Energy Management Regulation and Enforcement has identified numerous locations on the Atlantic Continental Shelf for potential development of offshore renewable energy sites. This initiative has the potential to impact maritime traffic along the entire Atlantic coast. To examine these potential impacts, identify mitigation measures, and facilitate balancing multiple and possibly competing uses of the waters along the Atlantic coast, mariners are encouraged to submit comments before the deadline, August 9, 2011. 76 Fed.Reg.7288 (May 11, 2011)

The Atlantic Coast Port Access Route Study for the Ports of Fernandina, Jacksonville and Canaveral, FL is located on Sector Jacksonville's Homeport page beneath Prevention – Waterways Management. First solicitation for feedback is due no later than July 25, 2011 for the August 2011 deadline. (<http://homeport.uscg.mil>)

For additional information please call Coast Guard Sector Jacksonville at (904) 564-7700.

R. E. Holmes

Commander, U.S. Coast Guard
Acting Captain of the Port, Jacksonville, FL
